<sup>(1)</sup> Substances presenting a health or environmental hazard which meet criteria laid down in Regulation (EU) No. 2020/878

<sup>(2)</sup> Substance with a Union workplace exposure limit

To obtain more information on the hazards of the substances consult sections 11, 12 and 16.

\*\* Changes with regards to the previous version

### SECTION 4: FIRST AID MEASURES

### 4.1 Description of first aid measures:

The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product.

#### legislation

### KE 31

## SECTION 4: FIRST AID MEASURES (continued)

#### By inhalation:

Remove the person affected from the area of exposure, provide with fresh air and keep at rest. In serious cases such as cardiorespiratory failure, artificial resuscitation techniques will be necessary (mouth to mouth resuscitation, cardiac massage, oxygen supply, etc.) requiring immediate medical assistance.

#### By skin contact:

Remove contaminated clothing and footwear, rinse skin or shower the person affected if appropriate with plenty of cold water and neutral soap. In serious cases see a doctor. If the product causes burns or freezing, clothing should not be removed as this could worsen the injury caused if it is stuck to the skin. If blisters form on the skin, these should never be burst as this will increase the risk of infection.

#### By eye contact:

Rinse eyes thoroughly with lukewarm water for at least 15 minutes. Do not allow the person affected to rub or close their eyes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, in which case this could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS of the product.

#### By ingestion/aspiration:

Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion.

#### 4.2 Most important symptoms and effects, both acute and delayed:

Acute and delayed effects are indicated in sections 2 and 11.

#### 4.3 Indication of any immediate medical attention and special treatment needed:

Non-applicable

#### SECTION 5: FIREFIGHTING MEASURES

### 5.1 Extinguishing media:

#### Suitable extinguishing media:

If possible use polyvalent powder fire extinguishers (ABC powder), alternatively use foam or carbon dioxide extinguishers (CO2).

#### Unsuitable extinguishing media:

IT IS RECOMMENDED NOT to use full jet water as an extinguishing agent.

### 5.2 Special hazards arising from the substance or mixture:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

#### 5.3 Advice for firefighters:

Depending on the magnitude of the fire it may be necessary to use full protective clothing and self-contained breathing apparatus (SCBA). Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...) in accordance with Directive 89/654/EC.

### Additional provisions:

Act in accordance with the Internal Emergency Plan and the Information Sheets on actions to take after an accident or other emergencies. Eliminate all sources of ignition. In case of fire, cool the storage containers and tanks for products susceptible to combustion, explosion or BLEVE as a result of high temperatures. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

### 6.1 Personal precautions, protective equipment and emergency procedures:

### For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area and keep out those without protection. Personal protection equipment must be used against potential contact with the spilt product (See section 8). Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, and also ensuring that all surfaces are connected to the ground.

### For emergency responders:

Wear protective equipment. Keep unprotected persons away. See section 8.

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any country-specific legislation

viton

# KE 31

# SECTION 6: ACCIDENTAL RELEASE MEASURES (continued)

#### 6.2 Environmental precautions:

Avoid at all cost any type of spillage into an aqueous medium. Contain the product absorbed appropriately in hermetically sealed containers. Notify the relevant authority in case of exposure to the general public or the environment.

# 6.3 Methods and material for containment and cleaning up:

It is recommended:

Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

6.4 Reference to other sections:

See sections 8 and 13.

### SECTION 7: HANDLING AND STORAGE

#### 7.1 Precautions for safe handling:

A.- General precautions for safe use

Comply with the current legislation concerning the prevention of industrial risks. Keep containers hermetically sealed. Control spills and residues, destroying them with safe methods (section 6). Avoid leakages from the container. Maintain order and cleanliness where dangerous products are used.

B.- Technical recommendations for the prevention of fires and explosions

Transfer in well ventilated areas, preferably through localized extraction. Fully control sources of ignition (mobile phones, sparks,...) and ventilate during cleaning operations. Avoid the existence of dangerous atmospheres inside containers, applying inertization systems where possible. Transfer at a slow speed to avoid the creation of electrostatic charges. Against the possibility of electrostatic charges: ensure a perfect equipotential connection, always use groundings, do not wear work clothes made of acrylic fibres, preferably wearing cotton clothing and conductive footwear. Comply with the essential security requirements for equipment and systems defined in Directive 2014/34/EC (ATEX 100) and with the minimum requirements for protecting the security and health of workers under the selection criteria of Directive 1999/92/EC (ATEX 137). Consult section 10 for conditions and materials that should be avoided.

C.- Technical recommendations on general occupational hygiene

Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Technical recommendations to prevent environmental risks

Due to the danger of this product for the environment it is recommended to use it within an area containing contamination control barriers in case of spillage, as well as having absorbent material in close proximity.

#### 7.2 Conditions for safe storage, including any incompatibilities:

| A Technical measures for | r storage |
|--------------------------|-----------|
| Minimum Temp.:           | 5 °C      |
| Maximum Temp.:           | 25 °C     |
| Maximum time:            | 24 Months |
|                          |           |

B.- General conditions for storage

Avoid sources of heat, radiation, static electricity and contact with food. For additional information see subsection 10.5

#### 7.3 Specific end use(s):

Except for the instructions already specified it is not necessary to provide any special recommendation regarding the uses of this product.

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1 Control parameters:

Substances whose occupational exposure limits have to be monitored in the workplace (European OEL, not country-specific legislation):

Directive (EU) 2000/39, Directive 2004/37/EC, Directive (EU) 2006/15, Directive (EU) 2009/161, Directive (EU) 2017/164, Directive (EU) 2019/1831:

| Identification                  | Occupational exposure limits |        |                       |  |
|---------------------------------|------------------------------|--------|-----------------------|--|
| Dipropylene Glycol Methyl Ether | IOELV (8h)                   | 50 ppm | 308 mg/m <sup>3</sup> |  |
| CAS: 34590-94-8 EC: 252-104-2   | IOELV (STEL)                 |        |                       |  |
| Xylene                          | IOELV (8h)                   | 50 ppm | 221 mg/m <sup>3</sup> |  |

#### 8.2 **Exposure controls:**

A.- Individual protection measures, such as personal protective equipment

In accordance with the order of importance to control professional exposure (Directive 98/24/EC) it is recommended to use localized extraction in the work area as a collective protection measure to avoid exceeding the occupational exposure limits. In case of using personal protective equipment it should have CE marking in accordance with Directive 2016/425/EC. For more information on Personal Protective Equipment (storage, use, cleaning, maintenance, class of protection,...) consult the information leaflet provided by the manufacturer. For additional information see subsection 7.1.

All information contained herein is a recommendation which needs some specification from the labour risk prevention services as it is not known whether the company has additional measures at its disposal.

B.- Respiratory protection

| Mandatory<br>respiratory tract<br>protection Filter mask for gases and<br>vapours CCE<br>CAT III EN 405:2002+A1:2010 Replace when there is a taste or smell of the<br>contaminant inside the face mask. This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any country-specific

legislation

### KE 31

### SECTION 10: STABILITY AND REACTIVITY

### 10.1 Reactivity:

No hazardous reactions are expected because the product is stable under recommended storage conditions. See section 7.

#### 10.2 Chemical stability:

Chemically stable under the indicated conditions of storage, handling and use.

#### **10.3** Possibility of hazardous reactions:

Under the specified conditions, hazardous reactions that lead to excessive temperatures or pressure are not expected.

#### **10.4** Conditions to avoid:

Applicable for handling and storage at room temperature:

| Shock and friction | Contact with air | Increase in temperature | Sunlight            | Humidity       |
|--------------------|------------------|-------------------------|---------------------|----------------|
| Not applicable     | Not applicable   | Risk of combustion      | Avoid direct impact | Not applicable |

#### 10.5 Incompatible materials:

| Acids              | Water          | Oxidising materials | Combustible materials | Others                        |
|--------------------|----------------|---------------------|-----------------------|-------------------------------|
| Avoid strong acids | Not applicable | Avoid direct impact | Not applicable        | Avoid alkalis or strong bases |

#### 10.6 Hazardous decomposition products:

See subsection 10.3, 10.4 and 10.5 to find out the specific decomposition products. Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide (CO<sub>2</sub>), carbon monoxide and other organic compounds.

### SECTION 11: TOXICOLOGICAL INFORMATION

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008:

The experimental information related to the toxicological properties of the product itself is not available

Contains glycols. It is recommended not to breathe the vapours for prolonged periods of time due to the possibility of effects that are hazardous to the health .

#### Dangerous health implications:

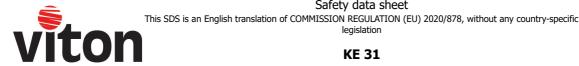

In case of exposure that is repetitive, prolonged or at concentrations higher than the recommended occupational exposure limits, adverse effects on health may result, depending on the means of exposure:

- A- Ingestion (acute effect):
  - Acute toxicity : Based on available data, the classification criteria are not met, however, it contains substances classified as dangerous for consumption. For more information see section 3.
  - Corrosivity/Irritability: Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.
- B- Inhalation (acute effect):
  - Acute toxicity : Based on available data, the classification criteria are not met. However, it contains substances classified as hazardous for inhalation. For more information see section 3.
  - Corrosivity/Irritability: Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.
- C- Contact with the skin and the eyes (acute effect):
  - Contact with the skin: Based on available data, the classification criteria are not met. However, it contains substances classified as hazardous for skin contact. For more information see section 3.
  - Contact with the eyes: Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.
- D- CMR effects (carcinogenicity, mutagenicity and toxicity to reproduction):
  - Carcinogenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for the effects mentioned. For more information see section 3.

IARC: Xylene (3); Ethylbenzene (2B); Hydrocarbons, C9-C12, n-alkanes, isoalkanes, cyclics, aromatics (2-25%) (3); Hydrocarbons, C9-C11,n-alkanes, iso-alkanes, cyclics, <2% aromatics (3); Naphtha (petroleum), hydrotreated heavy, < 0.1 % EC 200-753-7 (3)

- Mutagenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.

- Reproductive toxicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.

legislation

### **KE 31**

# SECTION 11: TOXICOLOGICAL INFORMATION (continued)

### E- Sensitizing effects:

- Respiratory: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous with sensitising effects. For more information see section 3.
- Skin: Based on available data, the classification criteria are not met. However, it contains substances classified as dangerous with sensitising effects. For more information see section 3.
- F- Specific target organ toxicity (STOT) single exposure:

Exposure in high concentration can interfere with the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.

G- Specific target organ toxicity (STOT)-repeated exposure:

- Specific target organ toxicity (STOT)-repeated exposure: Exposure in high concentration can interfere with the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.

- Skin: Repeated exposure may cause skin dryness or cracking
- H- Aspiration hazard:

Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.

Other information: Non-applicable

# Specific toxicology information on the substances:

| Identification  | A               | Acute toxicity  | Genus  |
|---|-----------------|-----------------|--------|
| Dipropylene Glycol Methyl Ether   | LD50 oral       | >5000 mg/kg     | Rat    |
| CAS: 34590-94-8   | LD50 dermal     | 9510 mg/kg      | Rabbit |
| EC: 252-104-2   | LC50 inhalation | >20 mg/L        |        |
| Xylene  | LD50 oral       | 2100 mg/kg      | Rat    |
| CAS: 1330-20-7  | LD50 dermal     | 1100 mg/kg      | Rat    |
| EC: 215-535-7   | LC50 inhalation | 11 mg/L (ATEi)  |        |
| Hydrocarbons, C9-C12, n-alkanes, isoalkanes, cyclics, aromatics (2-25%) | LD50 oral       | >2000 mg/kg     |        |
| CAS: 64742-82-1   | LD50 dermal     | >2000 mg/kg     |        |
| EC: 919-446-0   | LC50 inhalation | >20 mg/L        |        |
| Hydrocarbons, C9-C11,n-alkanes, iso-alkanes, cyclics, <2% aromatics     | LD50 oral       | >5000 mg/kg     | Rat    |
| CAS: Non-applicable   | LD50 dermal     | >2000 mg/kg     |        |
| EC: 919-857-5   | LC50 inhalation | >20 mg/L        |        |
| Amines, tallow alkyl, ethoxylated                                       | LD50 oral       | >2000 mg/kg     |        |
| CAS: 61791-26-2   | LD50 dermal     | >2000 mg/kg     |        |
| EC: 500-153-8   | LC50 inhalation | Non-applicable  |        |
| 3-aminopropyltriethoxysilane  | LD50 oral       | 1491 mg/kg      | Rat    |
| CAS: 919-30-2   | LD50 dermal     | 4000 mg/kg      | Rabbit |
| EC: 213-048-4   | LC50 inhalation | >20 mg/L        |        |
| Ethylbenzene  | LD50 oral       | 3500 mg/kg      | Rat    |
| CAS: 100-41-4   | LD50 dermal     | 15354 mg/kg     | Rabbit |
| EC: 202-849-4   | LC50 inhalation | 17,2 mg/L (4 h) | Rat    |
| 2-methoxy-1-methylethyl acetate   | LD50 oral       | 8532 mg/kg      | Rat    |
| CAS: 108-65-6   | LD50 dermal     | >5000 mg/kg     | Rat    |
| EC: 203-603-9   | LC50 inhalation | 30 mg/L (4 h)   | Rat    |
| N-butyl acetate   | LD50 oral       | 12789 mg/kg     | Rat    |
| CAS: 123-86-4   | LD50 dermal     | 14112 mg/kg     | Rabbit |
| EC: 204-658-1   | LC50 inhalation | 23,4 mg/L (4 h) | Rat    |

### 11.2 Information on other hazards:

#### **Endocrine disrupting properties**

Endocrine-disrupting properties: The product fails to meet the criteria.

### Substance-specific information:

| Identification                  |           | accumulation potential |
|---------------------------------|-----------|------------------------|
| Xylene                          | BCF       | 9                      |
| CAS: 1330-20-7                  | Pow Log   | 2.77                   |
| EC: 215-535-7                   | Potential | Low                    |
| Dipropylene Glycol Methyl Ether | BCF       | 1                      |
| CAS: 34590-94-8                 | Pow Log   | -0.06                  |
| EC: 252-104-2                   | Potential | Low                    |
| Ethylbenzene                    | BCF       | 1                      |
| CAS: 100-41-4                   | Pow Log   | 3.15                   |
| EC: 202-849-4                   | Potential | Low                    |
| 2-methoxy-1-methylethyl acetate | BCF       | 1                      |
| CAS: 108-65-6                   | Pow Log   | 0.43                   |
| EC: 203-603-9                   | Potential | Low                    |
| N-butyl acetate                 | BCF       | 4                      |
| CAS: 123-86-4                   | Pow Log   | 1.78                   |
| EC: 204-658-1                   | Potential | Low                    |

### 12.4 Mobility in soil:

| Identification  | Absorp          | otion/desorption     | V          | olatility                     |
|-----------------|-----------------|----------------------|------------|-------------------------------|
| Xylene          | Кос             | 202                  | Henry      | 524,86 Pa·m <sup>3</sup> /mol |
| CAS: 1330-20-7  | Conclusion      | Moderate             | Dry soil   | Yes                           |
| EC: 215-535-7   | Surface tension | Non-applicable       | Moist soil | Yes                           |
| Ethylbenzene    | Кос             | 520                  | Henry      | 798,44 Pa·m <sup>3</sup> /mol |
| CAS: 100-41-4   | Conclusion      | Moderate             | Dry soil   | Yes                           |
| EC: 202-849-4   | Surface tension | 2,859E-2 N/m (25 °C) | Moist soil | Yes                           |
| N-butyl acetate | Кос             | Non-applicable       | Henry      | Non-applicable                |
| CAS: 123-86-4   | Conclusion      | Non-applicable       | Dry soil   | Non-applicable                |
| EC: 204-658-1   | Surface tension | 2,478E-2 N/m (25 °C) | Moist soil | Non-applicable                |

# 12.5 Results of PBT and vPvB assessment:

Product fails to meet PBT/vPvB criteria

### **12.6 Endocrine disrupting properties:**

Endocrine-disrupting properties: The product fails to meet the criteria.

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any country-specific legislation

# SECTION 12: ECOLOGICAL INFORMATION (continued)

#### **12.7** Other adverse effects:

Not described

# SECTION 13: DISPOSAL CONSIDERATIONS

### 13.1 Waste treatment methods:

| Code      | Description   | Waste class (Regulation (EU) No<br>1357/2014) |
|-----------|---|---|
| 08 01 11* | waste paint and varnish containing organic solvents or other hazardous substances | Dangerous                                     |

### Type of waste (Regulation (EU) No 1357/2014):

HP14 Ecotoxic, HP3 Flammable, HP5 Specific Target Organ Toxicity (STOT)/Aspiration Toxicity

### Waste management (disposal and evaluation):

Consult the authorized waste service manager on the assessment and disposal operations in accordance with Annex 1 and Annex 2 (Directive 2008/98/EC). As under 15 01 (2014/955/EC) of the code and in case the container has been in direct contact with the product, it will be processed the same way as the actual product. Otherwise, it will be processed as non-dangerous residue. Waste should not be disposed of to drains. See paragraph 6.2.

### **Regulations related to waste management:**

In accordance with Annex II of Regulation (EC) No 1907/2006 (REACH) the community or state provisions related to waste management are stated

Community legislation: Directive 2008/98/EC, 2014/955/EU, Regulation (EU) No 1357/2014

## SECTION 15: REGULATORY INFORMATION (continued)

### Other legislation:

The product could be affected by sectorial legislation

### **15.2** Chemical safety assessment:

The supplier has not carried out evaluation of chemical safety.

# SECTION 16: OTHER INFORMATION

#### Legislation related to safety data sheets:

The SDS shall be supplied in an official language of the country where the product is placed on the market. This safety data sheet has been designed in accordance with ANNEX II-Guide to the compilation of safety data sheets of Regulation (EC) No 1907/2006 (COMMISSION REGULATION (EU) 2020/878).

#### Modifications related to the previous Safety Data Sheet which concerns the ways of managing risks.:

COMPOSITION/INFORMATION ON INGREDIENTS (SECTION 3):

· Removed substances

- 2-butoxyethanol (111-76-2)
- Cobalt bis(2-ethylhexanoate) (136-52-7)
- 2-ethylhexanoic acid, zirconium salt (22464-99-9)
- CLP Regulation (EC) No 1272/2008 (SECTION 2, SECTION 16):
  - · Substances contained in EUH208:
    - · Removed substances
    - Cobalt bis(2-ethylhexanoate) (136-52-7)

#### Texts of the legislative phrases mentioned in section 2:

- H412: Harmful to aquatic life with long lasting effects.
- H336: May cause drowsiness or dizziness.
- H373: May cause damage to organs through prolonged or repeated exposure (Inhalation).
- H226: Flammable liquid and vapour.

#### Texts of the legislative phrases mentioned in section 3:

The phrases indicated do not refer to the product itself; they are present merely for informative purposes and refer to the individual components which appear in section 3

#### CLP Regulation (EC) No 1272/2008:

Acute Tox. 4: H302 - Harmful if swallowed. Acute Tox. 4: H312+H332 - Harmful in contact with skin or if inhaled. Acute Tox. 4: H332 - Harmful if inhaled. Aquatic Acute 1: H400 - Very toxic to aquatic life. Aquatic Chronic 1: H410 - Very toxic to aquatic life with long lasting effects. Aquatic Chronic 2: H411 - Toxic to aquatic life with long lasting effects. Aquatic Chronic 3: H412 - Harmful to aquatic life with long lasting effects. Asp. Tox. 1: H304 - May be fatal if swallowed and enters airways. Eye Dam. 1: H318 - Causes serious eye damage. Eye Irrit. 2: H319 - Causes serious eye irritation. Flam. Liq. 2: H225 - Highly flammable liquid and vapour. Flam. Liq. 3: H226 - Flammable liquid and vapour. Skin Corr. 1B: H314 - Causes severe skin burns and eye damage. Skin Corr. 1C: H314 - Causes severe skin burns and eye damage. Skin Irrit. 2: H315 - Causes skin irritation. Skin Sens. 1: H317 - May cause an allergic skin reaction. STOT RE 1: H372 - Causes damage to organs through prolonged or repeated exposure (Inhalation). STOT RE 2: H373 - May cause damage to organs through prolonged or repeated exposure (Oral). STOT RE 2: H373 - May cause damage to organs through prolonged or repeated exposure. STOT SE 3: H335 - May cause respiratory irritation. STOT SE 3: H336 - May cause drowsiness or dizziness. **Classification procedure:** Aquatic Chronic 3: Calculation method STOT SE 3: Calculation method STOT RE 2: Calculation method Flam. Liq. 3: Calculation method (2.6.4.3)

#### Advice related to training:

Training is recommended in order to prevent industrial risks for staff using this product and to facilitate their comprehension and interpretation of this safety data sheet, as well as the label on the product.

The information contained in this safety data sheet is based on sources, technical knowledge and current legislation at European and state level, without being able to guarantee its accuracy. This information cannot be considered a guarantee of the properties of the product, it is simply a description of the security requirements. The occupational methodology and conditions for users of this product are not within our awareness or control, and it is ultimately the responsibility of the user to take the necessary measures to obtain the legal requirements concerning the manipulation, storage, use and disposal of chemical products. The information on this safety data sheet only refers to this product, which should not be used for needs other than those specified. - END OF SAFETY DATA SHEET -
